SNACKTIME TAP-TESTING

This picture was taken during behavioral studies conducted at the Duke Lemur Center at Duke University in Durham, North Carolina. Dr. Ehsan Dehghan-Niri is feeding an aye-aye by placing its favorite food in his hand, forming a fist to resemble a cavity. The aye-aye uses its specialized middle finger, which it employs for tap-testing in the wild, to probe the hand, mimicking its natural foraging behavior. Since aye-ayes are nocturnal, the red lighting replicates their natural nighttime environment, ensuring they remain comfortable and exhibit typical behaviors.
